GALVANIZED COAT

Zinc-Rich Galvanizing Spray

Galvanized Coat provides superior, long-term protection against rust and corrosion on ferrous bare metal and previously galvanized surfaces. Its galvanic action is equivalent to hot-dip galvanizing. Galvanized Coat bonds easily to metal and works by acting as a protective zinc layer that oxidizes instead of the metal underneath. This coat serves as a great touch-up or primer for marred or scratched hot-dip galvanized surfaces that can be painted over or left as a final protective coating.

Use in:

- Tractors
- Pipelines
- Storage Tanks
- Water Tanks
- Exhaust Stacks
- Outdoor Furniture
- Springs and Coils
- Metal Roofs/Gutters
- Boats
- HVAC
- Trailers
- Fencing
- Mufflers and Manifolds
- Construction Equipment
- Automotive/Truck Bodies
- Repairs to Hot-Dip Galvanizing

Features and Benefits

- Protects against rust and corrosion
- Equal to hot-dip galvanizing
- Use as a touch-up or primer
- Contains 99% Pure Zinc Metal

Properties

Appearance.....	Grey Liquid
Fragrance	Solvent
Ready to Use.....	Yes
Specific gravity.....	1.19
Flash point	-156°F
Stability.....	1 year
Solubility.....	Slight

Directions Complete directions on product label

Clean and prepare surface before spraying. Then spray several light coats, and allow 15 minutes of drying time between coats.

Active Ingredients

Zinc.....
2-Butanone.....
Xylene.....
4-Methyl-2-pentanone.....
Ethylbenzene.....

CAS Number

7440-66-6
78-93-3
1330-20-7
108-10-1
100-41-4

Safety

Danger: Extremely flammable. Vapor may cause flash fire. Vapor harmful. Contact may irritate eyes. Keep out of the reach of children.
