## STEAM TREAT

Protects condensate lines and tanks against corrosion

This liquid was formulated to provide corrosion protection in steam boiler condensate systems and other associated power equipment. Regular usage provides a pH adjustment to the untreated steam condensate and prevents the formation of harmful acids. It also provides protection to return lines and reduces the iron and copper content of the condensate.

#### **Features and Benefits**

contact edible products.

- Provides excellent protection of return line in high- and low-pressure systems.
- Prevents the formation of harmful acids, a major cause of steam pipe repair and replacement.
- Gradually descales condensate lines as it protects against corrosion.

Properties	
Appearance	Colorless liquid
Fragrance	Amine odor
Concentrate	Yes
Specific gravity	0.99
Flash point	154° F
pH	11.25-12.25

## **Directions** Complete directions on product label

Dosage will depend on the size and usage of the system, steam flow and amount of corrosive gases present. May be mixed with water or with other water treatment chemicals..

## **Authorizations**

USDA G6: Compounds for treating boilers and steam lines where steam may contact edible products, cooling systems where treated water may not

Active Ingredients	CAS Number
Water	7732-18-5
Cyclohexylamine	108-91-8
Diethylethanolamine	100-37-8
Polyalkylne glycol	9038-95-3

### Safety

Caution: May be harmful if swallowed. Keep out of the reach of children.

# **DOT Shipping** (ground transportation)

Proper Shipping Name: Corrosive Liquid, basic, organic,

N.O.S. (2-diethylaminoethanol,

cyclohexylamin

Class: 8 UN3267 Package Group: III
