

LED Canless Gimbal Downlight

Color Selectable

The canless LED recessed light with a 360° rotatable "eyeball" and 15° tilt is a versatile and modern lighting solution that allows you to easily adjust the direction of your lighting to suit your needs. The absence of a recessed can in the design makes installation a breeze, and the included junction box, plug and twist connection, and spring loaded clips ensure a simple and secure installation with a flush finish to your ceiling. This type of LED light fixture is a great option for anyone who wants to upgrade their lighting with a product that provides greater control and flexibility over the direction and intensity of their lighting, while also being easy to install.
